

BACKGROUND

If “Knowledge is Power” and “A Picture Paints a Thousand Words”, then a live, visual and interactive Dashboard is the ultimate marriage of the two. Recognizing the importance and prominence of Business Intelligence in managerial environments, Makosi’s Operations Dashboard was developed to manage the efficiency of project and operational team members, by providing real-time visibility into each individual’s, team’s and project’s performance.

TECHNICAL INFORMATION

WHAT IS IT?

A realtime, secure, interactive dashboard that effectively removes the dependency of Operations teams on Spreadsheets, Macros and other cumbersome reporting methodologies. The platform is easily customizable and is designed for rapid implementation.

HOW DOES IT WORK?

- Zero risk operations data is fed into a data warehouse via a database link, xml file or Excel spreadsheet
- The data is transformed into a standard format, accepted by a template dashboard, and customized for your needs
- You choose the format you need (i.e. .PDF, .PPT or .SWF)
- Data is refreshed each time you interact with the dashboard
- Numerous individuals can view/access the operations dashboard simultaneously

WHY DO I NEED IT?

Our online operations dashboard's customizable graphical interface allows everyone from individual specialists and Project Managers to Group Managers to cost-effectively:

- Create a structure for secure, standardized reporting
- Manage overall workload and prioritize workflow
- Track team and/or individuals productivity
- Access information in real time
- Standardize performance metrics
- Set benchmarks and identify high risk items efficiently
